Protecting Sensitive Data In and Around a Microsoft SQL Server Database

Enterprises storing sensitive data in a **Microsoft SQL Server database** need to consider the locations around the database where sensitive data might reside, even outside the direct control of the Database Administrators (DBAs).

Learn about:

- Files surrounding the **Microsoft SQL Server database** which may contain sensitive data
- What are the functions of these files
- Why these files should be protected

View the whitepaper and start protecting your sensitive data in your Microsoft SQL Server Database today. If you have immediate

questions, email us at sales@thalessec.net
(mailto:sales@thalessec.net) or call us at **+1-888-267-3732**
