

# Thales Data Discovery and Classification

## Build a strong foundation for data privacy and security

The first step for data privacy compliance is discovering and classifying sensitive data. Thales Data Discovery and Classification makes it easy for you to effectively find and protect sensitive data in this age of data sprawl.

With this solution, you can efficiently locate structured and unstructured data across the cloud, big data and traditional data stores. A single pane of glass allows you to get a complete understanding of your sensitive data and its risks using rich visualizations and useful insights.

Simple to deploy and use, Thales Data Discovery and Classification comes with a comprehensive set of built-in templates for rapid discovery of regulated data across your entire organization.

Now, you can make better decisions to close your security gaps, prioritize remediation, and ensure secure cloud migration and third-party data sharing.

Unlike alternative disjointed solutions that can leave data exposed or compromised, Thales Data Discovery and Classification provides a streamlined workflow, all the way from policy configuration, discovery and classification, to risk analysis and reporting, eliminating security blind spots and complexities. As a result, you can more easily uncover and mitigate your data privacy risks, enforce data sovereignty, and proactively respond to a growing number of data privacy and security regulations like GDPR, CCPA, PCI DSS and HIPAA.

### Effective for enterprise-wide data privacy

With Thales Data Discovery and Classification, you have an enterprise-wide data privacy solution that is simple to deploy and scale. It provides ready-to-use templates and a streamlined workflow to quickly discover your regulated data across traditional and modern repositories like the cloud and big data.

### Single pane of glass for clear visibility

Thales Data Discovery and Classification enables your organizations to get a clear understanding of your sensitive data, usage, and risks of exposure, from a single pane of glass. A centralized console with visualized data and aggregated reports can help you make informed decisions about data sharing, digital transformation, or prioritizing remediation.

### Built-in template for a quick start, but flexible enough to handle custom policies

Thales Data Discovery and Classification provides a comprehensive set of built-in classification templates for commonly requested data privacy and security regulations like GDPR, CCPA, etc., but is flexible enough to handle custom policies based on specific patterns, algorithms, etc.

## Demonstrate compliance

Thales Data Discovery and Classification provides detailed reports that can help your auditors demonstrate compliance to various regulatory and business laws. Efficient scans enable you to build a strong foundation for overall data privacy and security.

## Differentiators

- The solution deploys a streamlined workflow that significantly reduces complexities and risks for your organization.
- A single pane of glass enables your data privacy officer to uncover privacy gaps, prioritize remediation, and proactively respond to regulatory and business challenges.
- Effective scans help you discover both structured and unstructured data across a diverse set of data stores, setting up a strong foundation for overall data privacy and security,
- 'One vendor' vision of unified platform enables you to plan for holistic data privacy and security with Thales' comprehensive platform of market-leading data protection solutions.

## Key components of the solution

The initial offering will include the following components:

- Data Discovery and Classification server containing the scanning engine and classifier
- Data Discovery and Classification agents
- Management console

## About Thales

The people you rely on to protect your privacy rely on Thales to protect their data. When it comes to data security, organizations are faced with an increasing number of decisive moments. Whether the moment is building an encryption strategy, moving to the cloud, or meeting compliance mandates, you can rely on Thales to secure your digital transformation.

Decisive technology for decisive moments.
