

RSA® ID Plus Subscription Plans

A COMPLETE, SECURE IDENTITY PLATFORM—FOR EVERYONE, EVERYWHERE

Whether you're working in cloud, hybrid, or on-premises deployments, ensure that you have the right level of assurance, protection, and controls by choosing any of the RSA® ID Plus subscription plans that work best for you.

Trusted identity your way

ID Plus subscription packages provide all the capabilities you need in one solution to secure your business. Select the subscription package and add-ons that your business needs. You can also expand your ID Plus subscription plan with new add-ons as your needs change:

ID Plus C1

Authentication and access for users and applications in the cloud.

Cloud-only deployment that supports multi-factor authentication (MFA), attribute- and role-based access controls, single sign-on, web portal, and other capabilities.

Add-ons:

- ID Verification
- iShield Key 2 Series
- RSA Mobile Lock
- RSA SID700/DS100
- SMS/Voice OTP

ID Plus E1

Hybrid authentication for supported users and applications across all environments.

ID Plus E1 can be deployed across cloud, hybrid, and on-premises environments and supports MFA, attribute- and role-based access controls, Web and Agents / RADIUS integrations, cloud / on-premises directory, and more.

Add-ons:

- Adaptive Access
- Help Desk Live Verify
- ID Verification
- iShield Key 2 Series
- Passwordless
- Premium Support
- RSA Hardware Appliance
- RSA Mobile Lock
- RSA Risk AI
- RSA SID700/DS100
- SMS/Voice OTP

ID Plus E2

Hybrid authentication and access for users and applications across all environments.

ID Plus E2 can be deployed across cloud, hybrid, and on-premises environments and supports MFA, attribute-, role-based, and adaptive access controls, Web and Agents / RADIUS integrations, cloud / on-premises, and custom directory capabilities, customizable web portal and SSO for unlimited applications, customizable advanced workflows—including secure enrollment via ID verification—and more.

Add-ons:

- ID Verification
- iShield Key 2 Series
- Premium Support
- RSA Hardware Appliance
- RSA ID Plus Identity Governance
- RSA Mobile Lock
- RSA Risk AI
- RSA SID700/DS100
- SMS/Voice OTP
- Web Proxy

Benefits

A complete identity and access management (IAM) solution

The only complete passwordless access management solution that can extend across cloud, hybrid, and on-premises configurations

Security-first capabilities that protect against the most frequent and highest-impact cyberattacks

Attain operational efficiency at lower costs

ID Plus E3

Hybrid authentication and access, premium support, adaptive access controls, RSA® Risk AI, RSA® Mobile Lock, web proxy, secure enrollment via ID verification, and additional features across cloud, hybrid, and on-premises environments.

ID Plus E3 is the most comprehensive package, represents the best value, and includes premium features that are only available as add-ons in the other subscription packages.

Add-ons:

- ID Verification
- iShield Key 2 Series
- RSA Hardware Appliance
- RSA ID Plus Identity Governance
- RSA SID700/DS100
- SMS/Voice OTP

ID Plus M1

RSA ID Plus for Microsoft enhances security for Microsoft Entra ID with capabilities that prevent help desk fraud, build MFA resilience, and expand coverage across multiple environments.

ID Plus for Microsoft brings complementary identity security solutions to Microsoft Entra ID environments, including bi-directional identity assurance and offline and hybrid access.

Add-ons:

- Adaptive Access
- ID Verification
- iShield Key 2 Series
- Premium Support
- RSA Hardware Appliance
- RSA Mobile Lock
- RSA Risk AI
- RSA SID700/DS100
- SMS/Voice OTP

Add-Ons	
Adaptive Access	A more flexible and context-dependent approach to access, with conditional policies based on dynamic elements including device, network, and geographic location.
Help Desk Live Verify	Secure your help desk and end users bi-directionally against social engineering, ransomware, and technical support scams.
ID Verification	Secure enrollments and recovery streamline onboarding with RSA My Page, a no-code, policy-driven SSO and identity verification solution through ID Dataweb.
iShield Key 2 Series	A hardware authenticator that supports FIDO, PIV, HOTP authentication that uniquely offers secure, field-updatable firmware. All models are FIDO2 Level 2 certified and available with either FIPS 140-3 Level 3 certification or MIFARE physical access.
Passwordless	Eliminate phishing and credential-based attacks with passwordless authentication for users across environments and operating systems.
Premium Support	Get direct access to a team of support experts who can provide a heightened level of assistance and guidance, and faster response and resolution times.
RSA Hardware Appliance	Preconfigured, rack-ready appliance for on-premises RSA Authentication Manager. Simplifies deployment, eliminates infrastructure complexity, and delivers enterprise-grade authentication without cloud dependency.
RSA ID Plus Identity Governance	Replaces manual, ticket-driven access processes with automated request, approval, and provisioning workflows. Improves efficiency and access visibility across cloud and SaaS apps.
RSA Mobile Lock	Detects critical threats to a mobile device and restricts the user's ability to authenticate until the threat issue is resolved.
RSA Risk AI	Provides the most sophisticated level of automated access security by intuitively determining user risk before granting access to systems and data, keeping bad actors out and letting trusted people in. Adaptive access is pre-requisite
RSA SID700/DS100	Dedicated hardware authenticators that provide passwordless authentication for high-assurance environments.
SMS/Voice OTP	One-time password (OTP) delivered on-demand through SMS / voice telephony credits.
Web Proxy	Advanced integrations and standards, including Trusted Headers.
