SOPHOS

SOPHOS EMAIL

Stop AI-powered email attacks.

Enterprise-grade protection against evasive, AI-powered email threats.

Sophos Email stops AI-accelerated phishing, business email compromise (BEC), spam, and other email threats from reaching users' inboxes through multi-layered AI protection, unmatched threat intelligence, and strong identity and domain authentication. Integrated phishing simulation and security awareness training help organizations reduce cyber risk and build a culture of vigilance against modern email threats.

90%
of successful cyberattacks start with a phishing email[1]

86%
of security leaders express concern that GenAI will enable more advanced phishing and BEC attacks[2]

4x
increase in BEC attacks from 2024 to 2025[3]

WHAT SOPHOS EMAIL DELIVERS

Four outcomes. One monthly payment.

Stop phishing and BEC attacks.

AI gives attackers the ability to generate highly convincing and personalized phishing and BEC emails at scale. Sophos Email uses multiple AI, ML, and natural language processing models (NLP) to analyze the text, tone, context, and structure of emails, helping identify phishing, BEC, account takeover, QR-code, image-based, and other evasive attacks before they reach users' inboxes.

- 20+ AI and ML models, including NLP
- Contact trace and recall of forwarded threats
- QR-code scanning, URL protection, and time-of-click analysis

Enhance existing infrastructure.

AI-generated phishing, BEC, and identity-spoofing attacks are increasingly sophisticated, often bypassing built-in security features and putting your employees one click away from compromise. Sophos Email seamlessly integrates with your existing Microsoft 365 or Google Workspace infrastructure, strengthening your security to ensure that no email threat goes undetected.

- Seamless Microsoft 365 and Google Workspace integration
- Zero disruption to existing mail flow
- Purpose-built, automated or manual post-delivery clawback

Quantify and reduce human-driven email risk.

Technology alone cannot stop every attack. Integrated phishing simulation and security awareness training helps to measure user susceptibility, identify organizational risk, and inform stronger email security controls. Comprehensive reporting makes it easy to demonstrate participation, progress, and compliance.

- Built-in phishing simulation & awareness training campaigns
- Measure user susceptibility and identify organizational risk
- Comprehensive reporting for compliance

Expert-led response to critical email attacks.

Sophos Email provides comprehensive telemetry to the Sophos Managed Detection and Response (MDR) service, giving Sophos' security analysts exceptional visibility into email threats. When combined with threat signals from endpoints, networks, identities, and other sources, this unified view delivers the full picture of an attack, enabling Sophos' experts to rapidly identify, contain, and respond to attacks on your behalf.

- Deep email threat visibility for Sophos MDR
- Correlate email with endpoint, network, and identity signals
- Expert-led detection and response to critical attacks

SOPHOS EMAIL AT A GLANCE

- 20+ AI and ML models, including NLP, to identify sophisticated email threats
- Protects against phishing, BEC, account takeover, spam, and zero-day threats
- Built-in phishing simulation and security awareness training
- Seamless Microsoft 365 and Google Workspace integration

WHO SOPHOS EMAIL IS FOR

- Organizations facing AI-powered phishing, BEC, impersonation, and account takeover attacks
- Microsoft 365 and Google Workspace customers seeking enhanced email security
- Organizations looking to reduce their cyber risk with phishing simulations and user awareness training
- MSPs delivering comprehensive email security at scale

YOUR EDGE AGAINST AI-POWERED EMAIL ATTACKS

Built to stop AI-powered email threats.

Stop sophisticated phishing and BEC attacks

Attackers use AI to generate highly convincing phishing and BEC attacks at scale. Sophos Email uses AI, ML, and NLP models enriched with real-world threat intelligence from Sophos X-Ops to identify and stop phishing and BEC threats before they reach users.

Built for Microsoft 365 and Google Workspace

Modern email attacks increasingly evade built-in protections. Sophos Email strengthens Microsoft 365 and Google Workspace with additional threat detection, post-delivery response, and greater visibility into email threats.

Reduce cyber risk beyond technology

Technology alone cannot stop every attack. Integrated phishing simulation and security awareness training help organizations measure user susceptibility, identify risk, and strengthen their overall security culture.

INDUSTRY RECOGNITION

Validated by the analysts, customers, and labs that matter most.
